

Akhilesh Palve

Cyber Security Analyst | SOC Analyst

9370844839 ◇ akhileshpalve89@gmail.com ◇ Pune, MH, India ◇ [LinkedIn](#)

SUMMARY

Cybersecurity graduate with hands-on experience IN Vulnerability Assessment & Penetration Testing (VAPT), Security Operations (SOC), and Incident Response. Skilled in vulnerability scanning, triage, risk prioritization, remediation tracking, threat detection, and security monitoring using Nessus, OpenVAS, Splunk, and Wireshark. Strong understanding of CVSS, MITRE ATT&CK, OWASP Top 10, risk assessment, and cybersecurity best practices.

INTERNSHIPS

VAPT Intern

[CyArt](#) Nov '25 — Jun '26
Gujrat, India (Remote)

- **Led and coordinated a team of 20+ cybersecurity interns** across cloud security and vulnerability assessments
- Conducted weekly technical mentoring sessions covering **VAPT methodologies**, security practices, etc.
- Developed Python-based automation agents supporting **cloud security monitoring** and operational efficiency.
- Collaborated with **cross-functional teams** to troubleshoot security-related issues and improve platform security posture.

Security Intern

[Cyber Secured India](#) Mar '25 — Jun '25
Pune, India

- Performed vulnerability assessments across 25+ systems using **Nessus and OpenVAS** identifying security weaknesses and validating remediation efforts.
- **Contributed to a 20% reduction** in high-severity vulnerabilities through patch verification and remediation validation.
- Supported security operations activities including alert investigation, threat analysis, and vulnerability management.

SKILLS

Security Frameworks MITRE ATT&CK Framework, ISO 27001, GDPR, PCI DSS, SOX, VAPT, Incident Response, SIEM, IDS/IPS, Risk Assessment

Cloud & Platform Security AWS, SOAR, Security Automation

Tools Metasploit, Nmap, Qualys, Rapid7, Splunk

Languages English, Hindi, Marathi

PROJECTS

VARYS, Cybersecurity Jul '25 — May '26
Pune, India

- Designed an AI-assisted digital forensics platform to accelerate forensic investigations by analyzing multiple machine images simultaneously.
- Implemented automated file integrity verification and CVSS-based risk scoring to prioritize security findings.
- Improved digital forensics efficiency through parallel image analysis and automated threat assessment.

VAPT(HTB & THM)

- Performed VAPT on 25+ machines ranging from Linux, Windows, Unix

AWARDS

Best Project Award

MIT ADT University May '26

EDUCATION

B.Tech in Cybersecurity and Forensics, MIT ADT University (GPA: 7.41) Sep '22 — May '26
Pune, MH, India

CERTIFICATIONS

[Security+](#), CompTIA Jun '26

[CCST Cybersecurity](#), CISCO Mar '26
